

Personal Hygiene & Toy Care Guide

Why Hygiene and Care Matter

Maintaining proper hygiene and caring for your products ensures safety, durability, and a more enjoyable experience. Good cleaning practices prevent bacteria build-up, extend the life of your toys, and protect your health.

1. General Personal Hygiene Tips

- Urinate after intimacy to help flush out bacteria and reduce the risk of infections.
- Wash your hands before and after using personal items or toys.
- Always clean toys before and after each use.
- Pat dry thoroughly with a clean towel and store in a dust-free pouch.

2. Using Your Portable Bidet (450 ml, Pink or Blue)

How to Use:

1. Fill with clean, lukewarm water.
2. Select your preferred nozzle.
3. Squeeze gently to release a cleansing stream.

Care Instructions:

- Rinse all parts with warm, soapy water after each use.
- Allow to air dry fully before storing.
- Avoid harsh chemicals and boiling water.

3. Cleaning and Caring for Your Toys

General Guidelines:

- Remove batteries before cleaning.
- Never submerge electrical parts.
- Use a damp, soapy cloth for toys with electrical components.

Non-Porous Materials:

- Glass: Wash with warm water and mild soap. Pyrex can be boiled.
- Stainless Steel: Wash with soap and water unless attached to electrical components.
- Hard Plastic: Clean with antibacterial soap and water.
- Silicone: Wash with warm water and soap, toy cleaner, or boil (if no electrical parts). Never boil silicone vibrators with batteries or motors.

Porous Materials:

- Rubber: Porous and may contain phthalates; always use a condom over rubber toys. Wash gently with warm, soapy water.
- Cyberskin & Vinyl: Wash delicately with warm water and mild soap, then air dry. Dust lightly with cornstarch to maintain texture.

Other Materials:

- Nylon (e.g., harnesses): Machine-wash in a lingerie bag or hand wash with mild soap. Air dry.
- Leather: Wipe with a damp, soapy cloth. Condition with a leather-safe product after cleaning.

4. Storage & Safety

- Store toys separately in soft pouches to avoid material reactions.
- Keep in a cool, dry place away from sunlight.
- Do not share toys unless used with a condom.
- Discontinue use if irritation occurs.
